Critical Information Summary

Business nbn™ Plans

Broadband line speed: MyRepublic provides the choice of two nbn™ plans: The MyBusiness Lite and MyBusiness Pro.

When you service qualify your address we will provide you with an indication of expected access line speeds based on information from nbn™. Customers in FTTN, FTTB and FTTC areas may be in co-existence, if so we recommend you select the Unlimited Essential plan.

- The MyBusiness Lite Plan is associated with the nbn™ 50 product which provides a maximum access line speed of 50Mbps (download) and 20Mbps (upload).
- The MyBusiness Pro Plan is associated with the nbn™ 100 product which provides a maximum access line speed of 100Mbps (download) and 40Mbps (upload).

^nbn™ 50 and nbn™ 100 refer to nominal access line speed, which represents the maximum possible speed that is available during off peak (11pm-7pm) and speeds will vary based on the technology connecting your location to the nbn™ and other factors. Your speed during typical busy periods (7pm-11pm) will be slower. FTTN, FTTB and FTTC speeds to be confirmed once active and within 20 days of connection, if your line cannot provide acceptable speed levels of your plan and this cannot be fixed, you can move to a lower speed plan or exit your contract without charge by contacting MyRepublic within 10 days of receipt of your line speeds.

Co-Existence period: A co-existence period may exist for services using nbn™ FTTB, FTTN and FTTC for 18 months from when nbn™ became available in that area. During this period exchange based ADSL and/or special services may co-exist on the same network infrastructure as the nbn™ services. In this case, your speed may be affected due to interference from equipment or network provided by other services.
